PERSONAL STATEMENT

Software Engineering graduate with a background in developing internal software applications for Times-7 and extensive experience providing customer service for Bunnings. Currently looking into positions within software development, data, or IT support.

EDUCATION

Bachelor of Engineering (Honours) | Jan 2021 - 2024

Victoria University of Wellington

Major in Software Engineering and specialisation in Artificial Intelligence

WORK EXPERIENCE

Software Engineering Intern | Nov 2025 - Present

Times-7

- Built a production web application integrating demand forecasting and job scheduling, deployed to operations team for daily planning workflows.
- Generated forecasts using Python and built real-time backend synchronisation with Supabase for live data updates.

Team Member | Sep 2020 - Present

Bunnings Warehouse

- Worked across replenishment and front-end departments for five years.
- Handled customer questions, product issues, and payment problems under busy conditions.
- Supervised self-checkout and resolved system issues on the spot to keep things moving.

PROJECT WORK

Course Visualiser | *Web Development*

- Built a web app in a team using Svelte for academic advisors to search and filter course data with a connected backend and Git-based collaboration.
- Designed a responsive interface focused on usability and clear data presentation.

Fish Breeding Research | *AI*

- Implemented an Interval Genetic Programming model in Python to classify fish growth rates from real genetic data, benchmarked against Logistic Regression and Gradient Boosting.
- Handled missing and uncertain data without standard imputation techniques.

Chaps Challenge | *Java*

- Developed backend components for a Java-based 2D game recreation.
- Implemented XML parsing to load game levels and configuration data.
- Built functionality to persist and restore game state using XML.

SKILLS

Technical

- Agile
- AWS
- CI/CD
- CSS, HTML & Tailwind
- Docker
- Git
- Java
- JavaScript & TypeScript
- Linux
- OAuth
- Python
- React
- RESTful APIs
- Ruby
- Rust
- SQL & Supabase
- Svelte

Soft

- Adaptability
- Problem solving
- Teamwork
- Attention to detail
- Customer service
- Quick Learner
- Reliable
- Leadership
- Troubleshooting

CERTIFICATIONS

AWS Certified Cloud Practitioner

AWS Academy Cloud Foundations
